PURPOSE STATEMENT:

HALO is a complex of microbes, enzymes, bio-stimulants, and a variety of microbe food sources designed specifically for cannabis plants to enhance the indigenous plant-friendly microbial populations in your soil. Witness your cannabis plants experience a celestial level of growth, reaching their own horticultural halo.

DIRECTIONS FOR USE:

HALO can be applied directly to the soil or added to water for broadcast spray, greenhouse drench, root dip, or seed inoculation applications.

Apply 4.25 to 8.5 oz/acre of soil for direct application to soil. If broadcast or greenhouse drench, add 16 oz of product to every 100 gallons of water and mix thoroughly. Spray 25 gallons per acre. If root dip, mix 16 oz of product in every 100 gallons of water and mix thoroughly. Root dip thoroughly in solution to fully coat the roots before transplanting to the soil. Consult your representative for seed inoculation recommendations.

RESULTS: (STORAGE & HANDLING)

Store between 40 F and 85 F in a dark place protected from direct sunlight or high heat.

Do not allow moisture to come in contact with product that is not being used.

If clumping exists, break into useable chunks.

The product is still usable and will mix readily with water.

Between uses: close the zip lock seal on the pouch completely and then squeeze all excess air out through one way valve to avoid clumping.

Do not inhale. Use only as directed.
