

All-Natural Probiotic for Cannabis Plants

MICROBIAL POWERHOUSE

Unleash indigenous microbes for explosive growth and improved soil health.

ROBUST PLANT DEVELOPMENT

Stimulate mitochondrial action for stronger roots and healthier plant tissues.

CANNABIS FLOWER BOOST

Amplify flowering in cannabis plants for abundant and vibrant blooms.

TOMIGUNN HALO is a complex of microbes, enzymes, bio-stimulants, and a variety of microbe food sources designed for cannabis plants to enhance the indigenous plant-friendly microbial populations in soil.

Unlock Enhanced Nutrient Uptake

HALO harnesses the power of beneficial microorganisms to optimize nutrient absorption. These microorganisms establish a symbiotic relationship with the roots, creating a robust network that enhances the availability of vital nutrients.

Promote Soil Health and Structure

By introducing beneficial bacteria and fungi, HALO stimulates the development of stable soil aggregates, resulting in improved structure, aeration, and water-holding capacity. It promotes stronger, more vigorous roots that penetrate deeper and absorb nutrients more efficiently.

The inclusion of carefully selected beneficial microbes creates a natural defense system. These microorganisms produce powerful antimicrobial compounds that inhibit the growth of harmful fungi and bacteria, safeguarding your crop and minimizing the risk of yield loss.

“ HALO is designed to promote bountiful harvests of CBD, THC, and larger, more magnificent flowers.

Optimize Water and Nutrient Retention

HALO improves water-holding capacity and enhances nutrient retention, ensuring a consistent supply of essential elements for your plants. Enjoy improved drought tolerance, reduced water consumption, and increased nutrient efficiency, ultimately leading to higher yields and healthier crops.

Embrace Sustainable Cultivation

Reduce your reliance on synthetic fertilizers and harmful chemicals and embrace a more environmentally friendly approach. By harnessing the power of nature's microorganisms, you contribute to a healthier ecosystem and produce cannabis products of exceptional quality and purity.

Proven Results and Expert Support

Our microbial additive has been rigorously tested and trusted by premiere cannabis growers. With a track record of delivering outstanding results, our product has earned the reputation of being a game-changer in the industry. We provide expert support every step of the way, ensuring that you have the guidance and knowledge needed to maximize your success.
