

Poultry Probiotic Supplement

ENHANCED GUT HEALTH

LEMONAIDE contains a meticulously crafted blend of beneficial microorganisms that populate the gastrointestinal tract of birds.

IMMUNE SYSTEM SUPPORT

LEMONAIDE enhances the immune systems of your poultry, reducing the risk of disease outbreaks and minimizing reliance on antibiotics or other medications.

IMPROVED NUTRIENT USE

LEMONAIDE assists in breaking down the complex nutrients, such as carbohydrates and proteins, found in poultry feed into simpler forms for absorption in the gut.

TOMIGUNN LEMONAIDE is an all-natural poultry probiotic feed supplement designed to enhance the overall health and well-being of your birds and boost their productivity.

“ LEMONAIDE fosters the happiest, healthiest birds, promoting growth and reducing mortality.

Enhanced Digestive Health

LEMONAIDE contains a meticulously crafted blend of beneficial microorganisms that populate the gastrointestinal tract of birds.

A well-functioning digestive system ensures efficient nutrient absorption. When birds can extract more essential nutrients from their feed, it directly translates to improved growth and development. This means that your poultry will be healthier and more productive, with enhanced body weight gain and better utilization of nutrients.

Cautionary Statement

CAUTION: Using chlorine, copper sulfate, iodine, other chemical acidifiers, antibiotics, disinfectants, or peroxide in the water lines may disrupt the beneficial microbes in TOMIGUNN probiotics. If chemicals are used during the growth cycle, start over immediately building the beneficial microbes in the birds by following the directions.

The use of chemicals in the water supply during the time the birds are in the house undermines the goal of providing beneficial microbes to the birds, as it effectively eliminates these beneficial microorganisms.

It is recommended that water lines are cleaned between each flock and thoroughly flushed of chemicals before bird placement.

Improved Nutrient Utilization

LEMONAIDE's advanced probiotic formula assists in breaking down the complex nutrients, such as carbohydrates, proteins, and fats, found in poultry feed into simpler forms for absorption in the gut. As a result, nutrients are more readily available to the birds, ensuring they get the maximum benefit from their diet.

Immune System Support

By bolstering your poultry's immune systems, LEMONAIDE helps prevent disease outbreaks and reduces the need for antibiotics or other medications.

Easy Application

LEMONAIDE comes in a convenient water-soluble form, making it effortless to administer to your flock. Say goodbye to mediocrity and embrace the power of probiotics to unleash the full potential of your flock. Healthy, happy, and productive birds are just a sip away!

Statement of Guarantee

LEMONAIDE poultry probiotic is Animal Protein-Free and GMO-Free, aligning with our commitment to providing natural and non-modified solutions. Additionally, our product is Antibiotic-Free and Pesticide-Free, contributing to the overall health and well-being of poultry.
